

Chapter-1: overview of C

Pervious Year Questions (Year 2022,2021,2020)

1. Define structure programming language. Discuss the structure of C programming Language.
2. Define the following Terms:
 - Algorithm
 - Flowchart
 - Pseudo-code
3. Write a program to calculate the area and perimeter of a circle.
4. What is structured programming? Explain different control structures used in structure programming.
5. Define Pseudo-code. Write down the differences between Algorithm and Flowchart.
6. What do you mean by preprocessor directive? Why and when do we use the #include and #define directives?
7. Write an Algorithm to determine whether a number is even or odd.
8. What do you mean by structured programming language? Write down some salient features of structured programming language.
9. Describe the basic structure of a C program.
10. Define Flowchart. Draw the flowchart to find the largest value among three numbers.
11. Write down the Algorithm to find the area and perimeter of a rectangle.
12. Write down an algorithm and flowchart to calculate the temperature Fahrenheit to Celsius.
13. Draw and explain the flowchart that shows the process of compiling and running a C program.
14. What is pre-processor directive and header file? Give example.
15. Write down the functions of <stdio.h> and <math.h> header files.

Pervious Year Questions (Year 2023)

16. What do you mean by structured programming language? Explain different control structures used in structured programming language.
17. What do you mean by preprocessor directive? Why and when do we use the #include and #define directives?
18. Draw a flowchart to determine the roots of a quadratic equation, $ax^2+bx+c=0$.
19. Write down the steps of executing a C program.
