

1. Write a C program to find the area and perimeter of a triangle (three sides of the triangle are given).
2. Write a C program to find the area and perimeter of a rectangle.
3. Write a C program to find the area and circumference of a circle (Use π as a symbolic constant).
4. Write a C program to convert the given temperature in Fahrenheit to Celsius.
5. Write a C program that takes a floating point number as input and display the floating point and integer part separately .
6. Write a C program to determine whether a number is odd or even.
7. Write a C program that takes student's mark as input and displays the corresponding Letter Grade.
8. Write a C program to determine the largest element among three numbers.
9. Write a C program to determine whether a year is a leap year or not .
10. Write a C program to find all possible roots of a quadratic equation.
11. Write a C program to find the GCD of two integers
12. Write a C program that takes an integers as input and display it in reverse order also compute the sum of digits.
13. Write a C program to find the factorial of an integer.
14. Write a C program to find the first n Fibonacci numbers.
15. Write a C program to find the sum of the series: $1/1! + 2/2! + 3/3! + \dots + 7/7!$
16. Write a C program to display all elements of an array and also display the sum and average of the elements of that array.
17. Write a C program to find out the largest element from an array.
18. Write a C program to search an element in an array.
19. Write a C program to find the sum of two matrices of size 3×3 .
20. Write a C program to determine whether a string is a palindrome or not.
21. Write a C program to find the first n Fibonacci numbers using recursion.
22. Write a C program to perform all basic operations on a string.
23. Write a C program to count the number of vowels and consonants in a string
24. Write a C program using pointers to read an array of integers and print its elements in reverse order.

25. Write a C program to record student information according to their merit position.
26. Write a C program to read data from the keyboard, write it to a file called INPUT, then read the same data from the INPUT file and display it on the screen.
27. Write a C program to copy or append one file to another.
